Maxi Grower

Maxi Grower is a grain based, highly palatable feed formulated to deliver **high protein** and high energy for beef cattle. Designed to be fed alongside pasture, hay, or chaff, Maxi Grower supports consistent growth, improved performance, and efficient weight gain.

Maxi Grower is ideally suited for strategic feeding applications such as getting heifers to joining weight and spike feeding breeders, where it should be fed at 1-2% of bodyweight. For grain assist or feedlot operations, Maxi Grower can be fed ad libitum to maximize **growth potential**.

To enhance productivity, Maxi Grower contains sodium monensin, which improves liveweight gain and feed conversion efficiency. It also includes **Bovacillus**, a natural probiotic that supports digestive health and better nutrient absorption.

Fortified with essential vitamins and minerals, Maxi Grower ensures balanced nutrition, stronger growth, and overall livestock health and performance.

Nutrients Dry Matter Basis

Dry Matter	88% min
Crude Protein	15.5% min
Equiv Crude Protein	4% max
Urea	1.2% max
Energy	12.0mj me/kg min
Calcium	0.55% min
Phosphorus	0.3% min
Sodium Monensin	25mg/kg

Ingredients

Benefits

Rolled Sorghum	High Protein
Cracked Chickpeas	High Energy
Bovacillus	Highly Digestive
Protein Meal	Highly Palatable
Molasses	Promote Rumen Development
Urea	Essential Vitamins and minerals
Grower Concentrate	Sodium Monensin for improved liveweight gain and feed conversion efficiency
	Contains Bovacillus a Natural Probiotic Supplement Developed to Improve the Digestive Health of Cattle.
